

2010 State Senate District Layer

Michigan Geographic Framework

Field Definitions

(Shapefile Attribute Table)
(June 1, 2014 – Version 14a)

The following field definitions make up the shapefile attribute table called State Senate 10 District Layer. Each polygon represents a 2010 Michigan State Senate District. The attribute table can be found in the file senate10_999v14a.DBF where 999 equals the FIPS county number contained in the file. The FIPS county numbering system uses odd numbers only. The numbers are assigned in alphabetical order. For example, county 001 is Alcona and county 165 is Wexford. The attributes describe the data attached to polygons that represent 2010 Michigan State Senate boundaries as assigned to the Michigan Geographic Framework (MGF).

Please Note: If you have any questions about the framework data you have received, please contact Josh Ross at the Center for Shared Solutions and Technology Partnerships. Phone: 517-373-7910, email: rossj@michigan.gov

Field Name	Type	Size	Description	Comments
NAME	C	3	2010 State Senate District Name	Value assigned to represent each 2010 State Senate District. Many 2010 State Senate districts are split by a county boundary. Therefore, an entire district may not be provided with a single county shapefile.
LABEL	C	3	2010 State Senate District Label	The 2010 State Senate district label
TYPE	C	2	Type of Polygon feature	The type will be District for the State Senate District Layer
CNTY_CODE	C	3	Federal Number Identifying a County	The value represents the county that the polygon feature is geographically located.
LEGISLATOR	C	50	State Senator's Name	Name of the State Senator for each District
PARTY	C	1	Political Party	Political party in which the Senator is affiliated
URL	C	50	Website Address	The website address for each Senator
SQKM	N	16,3	Area in Square Kilometers	The values in these three area fields are calculated from the square meter area field in the ArcInfo Polygon Attribute Table (PAT).
SQMILES	N	16,3	Area in Square Miles	
ACRES	N	16,3	Area in Acres	

2010 State Senate District Layer Continued

Field Name	Type	Size	Description	Comments
VER	C	3	Michigan Geographic Framework Version Number	The VER field contains the Michigan Geographic Framework version from which the layer was created.
LAYOUT	C	10	Paper orientation for printing maps	This field is used to determine paper layout when creating cartographic products
PENINSULA	C	5	Peninsula that the polygon is located	

Type: C Character
