

# Statewide Census Designated Place Layer

## Michigan Geographic Framework

### Field Definitions

(Shapefile Attribute Table)  
(June 1, 2012 – Version 12b)

The following field definitions make up the shapefile attribute table called Statewide Census Designated Places. Census designated places (CDPs) are closely settled, named, unincorporated communities that generally contain a mixture of residential, commercial, and retail areas similar to those found in incorporated places of similar sizes.

The attribute table can be found in the file Cdp\_MI\_v12b.DBF.

**Please Note:** If you have any questions about the framework data you have received, please contact Laura Blastic at the Michigan Center for Geographic Information. Phone: 517-373-7910, email: [blasticl@michigan.gov](mailto:blasticl@michigan.gov)

Field Name	Type	Size	Description	Comments
FIPSCODE	C	5	Federal Number Identifying a Census Designated Place (CDP)	This Census Designated Place layer is being distributed by county. If a Census Designated Place is split by a county boundary, then the Census Designated Place will be split into multiple polygons.
FIPSNUM	N	5	Federal Number Identifying a Census Designated Place (CDP)	FIPSCODE as a numeric value.
NAME	C	37	Census Designated Place Name	Census Designated Place names are provided without a suffix. For example, the Census Designated Place Haslett will be provided as Haslett.
LABEL	C	37	Census Designated Place Name with Suffix	Census Designated Place labels are provided with a suffix. For example, the Census Designated Place Haslett will be provided as Haslett CDP.
TYPE	C	2	Type of Polygon feature	The type will be CDP for the Census Designated Place Layer

## Statewide Census Designated Place Layer continued

Field Name	Type	Size	Description	Comments
LINK	C	8	Link Number.	Concatenating the Federal Information Processing System (FIPS) county code with the Place number creates the Link number. The LINK number accounts for CDPs that are split by a county line. The LINK numbers also allow the polygons to be linked to census data.
CNTY_CODE	C	3	Federal Number Identifying a County	The value represents the county that the polygon feature is geographically located.
SQKM	N	16,3	Area in Square Kilometers	The values in these three area fields are calculated from the square meter area field in the ArcInfo Polygon Attribute Table (PAT).
SQMILES	N	16,3	Area in Square Miles	
ACRES	N	16,3	Area in Acres	
VER	C	3	Michigan Geographic Framework Version Number	The VER field contains the Michigan Geographic Framework version from which the layer was created.
LAYOUT	C	10	Paper orientation for printing maps	This field is used to determine paper layout when creating cartographic products
PENINSULA	C	5	Peninsula that the polygon is located
