

## Statewide Railroads Layer

### Michigan Geographic Framework

#### Field Definitions

(Shapefile Attribute Table)  
(Sept. 24, 2003 – Version 3b)

The following field definitions make up the shapefile attribute table called Statewide Railroads. This shapefile consists of segments that have an FCC (Framework Classification Code) of B00, B11, B12, B13, B21 and B22.

The attribute table can be found in the file Rail\_MI\_v3b.DBF.

| Field Name | Type | Size | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Comments                                                                                             |
