Michigan Geographic Framework (MGMF) is a project of the Michigan Department of Transportation (MDOT) and the Michigan State Office of Geographic Information Systems (MOSGIS). It is a collaborative effort between MDOT and MOSGIS to create a consistent and accurate geographic framework for Michigan. The MGMF includes a base map of Michigan, as well as various layers of geographic information, such as roads, water features, and land use. The MGMF is available for use by the public, and is updated regularly. For more information, please visit the MGMF website at [www.michigan.gov/mgmf](http://www.michigan.gov/mgmf).
